## KEVIN CAIN BIOGRAPHY

Kevin Cain is the CTO of Aria Group, a company that specializes in innovative solutions for the transportation industry. He has a long history of working on cutting-edge projects that challenge the boundaries of engineering and design.

Kevin joined Clive Hawkins in founding Aria Group in 1997 and was able to share his expertise with many of the world's leading transportation companies in providing them with groundbreaking solutions to the creation of their design prototypes. This involved combining the very latest in manufacturing technologies with sophisticated custom software solutions to oversee and accelerate these projects.

While the specifics of Kevin's work remain undisclosed due to the confidential nature of the programs that Aria undertakes, the impact of his efforts can be seen across many fields from advanced air mobility, autonomous vehicles, next-gen composite manufacturing methods, and even motion pictures.

Kevin currently resides in Traverse City, MI with his wife Krista and three children.
