

Blain is the Chief Operating Officer (COO) at BETA Technologies, a Vermont-based company that is developing an electric transportation system to make aviation greener, safer and more accessible. At BETA, Blain leads the company's commercialization strategy and approach, ensuring the business is well-supported to execute its ambitions. He brings extensive experience, having previously held executive leadership posts at several high-growth, global healthcare technology companies including HIMSS Analytics, CapSite and Allscripts. In these roles, he oversaw multiple global product launches, opened new operations on 4 continents, and led multiple M&A transactions valued collectively at more than \$1bn. Blain holds his degree in Business and Accounting from SUNY Geneseo and has been a long-time fan of aviation, having grown up around the 174th [Attack Wing] in Syracuse, NY. When he's not at work, Blain is an avid fly fisherman and enjoys spending time in the mountains with his wife as they chase their young kids around.
